Exercise Sheet 2

Group work: Please keep in mind that the exercises are meant to prepare you for the exam.
ChatBots: Use your own brain as much and as often as possible.

Exercise 1 (Bar vs. Pie Charts)

In StudIP you also find the file `exercise02_code.zip` which contains the implementation of a bar chart in Java and Python. The implementation only uses basic drawing primitives. Based on this code implement a pie chart in Java and/or Python.

Exercise 2 (Waffle Charts)

Based on the code in `exercise02_code.zip` implement a Waffle Chart (10x10) in Java and/or Python. Waffle Charts are also sometimes called Square Pie Charts (see `https://en.wikipedia.org/wiki/Pie_chart`).

Exercise 3 (Infographic)

Design an original and informative infographic related to a topic of your own choice. Before and during the design of your infographic, consider the following guiding questions:

- What information is relevant?
- Are data sources for this information available?
- How can the information be visually represented?
- What are suitable metaphors?
- What could be the story of your infographic?
