Exercise Sheet 3

Group work: Please keep in mind that the exercises are meant to prepare you for the exam.
ChatBots: Use your own brain as much and as often as possible.

For this assignment slides 53 to 59 about Gestalt Laws in the slide set of the lecture on visual perception are relevant. You should download the slides from the lecture website and have a look at them, before you start working on this assignment.

Exercise 1 (UML Class Diagram Layout)

Carefully read the article *"On Evaluating the Layout of UML Class Diagrams for Program Comprehension"* (PDF available in StudIP), then evaluate the two provided class diagrams according to the **criteria C1 to C14** described in the article.

1. Check for each diagram whether it adheres to those recommendations and indicate which diagram you prefer.
2. For each rule violation you identify, you should describe which part of the diagram violates the recommendation.
